

## RICOH TotalFlow Production Manager™

Pre-Press to Print  
Production Management

Automate job management to **maximize  
your sheet-fed printer utilization**

**RICOH**  
imagine. change.

# Fast, accurate and affordable production printing

Vendor neutral by design, RICOH TotalFlow Production Manager increases the efficiency of your workflow, maximizes device utilization, and reduces costs. From job inception to completion, this scalable solution can streamline your operations by automating repetitive tasks to reduce operator interventions, labor costs and risk of errors, and increase productivity.

## Increase efficiency from prepress to print

Reduce repetitive pre-production tasks, improve output quality, and produce more work in a day by creating dynamic, reusable workflows.

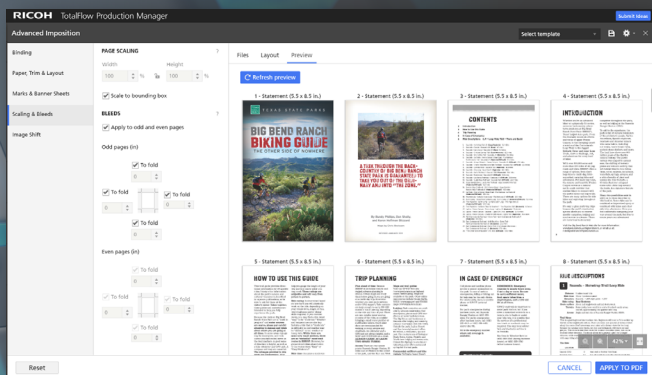

- Maximize device utilization with intelligent scheduling based on job attributes, including media and finishing, and due date tracking
- Manage jobs with page-level exceptions, such as stapling, and create conditional JDF/JMF workflows
- Improve production accuracy and file integrity with full PDF Adobe® job submission with ticketing

## Improve visibility, communication and control of operations

Easily oversee your entire shop floor by connecting up to 15 devices with one instance of the solution. Email notifications at the job- and printer-level to improve communications across your business.

- Control your print tasks centrally and keep all your print protocols within one view
- Monitor and improve operator knowledge and efficiency with reports on media usage as well as color and B&W page counts.
- Provide awareness of shop-wide scheduled work for a clear representation of job completion status

# Better Together

Submit print jobs faster by integrating RICOH Production Manager and RICOH TotalFlow Prep. By working together these solutions eliminate more manual steps in print job preparation. Rapidly create print-ready PDF files put of multiple file formats, including scanned documents.

## Attain higher profits with shop-wide integration

Achieve improved utilization of material, labor and equipment by taking advantage of the solution's vendor-neutral design to unite devices and applications.

- Turn jobs faster and minimize downtime by pooling printers for load-balancing to ensure the most efficient and fastest path to job completion, with the assurance of backup
- Increase output accuracy with visual job tickets that preview how the job will print and add optional approval and proof-printing steps to avoid reprints
- Create additional workflow efficiencies by integrating with other supported applications, such as MarcomCentral®

## Capture more business with increased versatility

Satisfy more client requirements and accept new projects with the ability to handle more file formats, print languages and protocols.

- Print Postscript/PCL and PDF data streams and use LPR and hot folder submissions
- Send jobs to print from the browser interface as well as from native applications using printer drivers for Mac® and PC
- Convert data streams to PDF for job ticketing, reading or archiving, and map them to replace embedded tray, paper and finishing commands
